

Assignment-8(Animation)

Create an application that has a sequence of animations. Application contains two view controllers.

- a) First VC contains two textfields that appear(slide) at the same time(first from left, second from right).
- b) Whenever user presses the button, second view controller will appear changing the scale. You should do this with custom segue.
- c) Right after the animated transition between view controllers is done, tableview should appear, by sliding the cells from the left side of the screen consistently.
- d) TableViewCell contains the smartphone title, price and info button.
- e) Whenever user presses the info button, another view should flip from top, showing the detailed information about the smartphone. If user clicks the hide button, it should transition back(slide right) to the TableViewCell.

YOUR APP MUST BE EXACTLY THE SAME!
