

Assignment-3(Paint App)

Create the paint application for iPad that contains the following tools:

- a) Circle
- b) Rectangle
- c) Line
- d) Triangle
- e) Pen

User must have the ability to change the color of the object and choice whether this object is going to be filled or not. There is also an undo button that listens two events (touch up inside, long pressed). If you click on this button it should remove the last object. If you long press on button it should remove all the objects from screen. Do exactly how it's in the video. Apply MVC!
