Assignment-9(Twitter)

Continue an application that was shown on the lecture based on Firebase.Basically, the application is about user registration, login, user info, tweet list and ability to tweet.
Detailed info about this app is the following:

a) User must enter name, surname, date of birth, email and password in order to register properly.

b) User can also upload his profile picture from gallery or camera.

c) User enters only email and password in order to sign in.

d) Right after signing in, user must be able to see his personal info(name, surname, date of birth) and list of his tweets.Figure out the way of organizing this data's(tweets and info) on the right UI.

e) User can delete and change a tweet. Whenever he changes the date also gets updated.

f) Tweet must contain the tweet itself, date of tweet, user who tweeted and hashtag. Don't forget that user must be able to tweet and delete the tweet as well.

g) Make sure that user can search the tweets by entering the hashtag to a search bar

h) User also must be to change his personal information(name, surname, date of birth and profile picture)

i) Last but not least, user must be able to sign out from his session.

THERE IS NO VIDEO, BECAUSE I WANT YOU TO USE YOUR OWN IMAGINATION
