Assignment-2(Contact Book)

Create the contact book app which contains the following:

A) List of your contacts with 1 imageview 2 labels(photo,name surname, phone number)

B) Add button(plus sign)

C) New contact ViewController after clicking add button. Inside this controller 2 textfields(name surname, phone number) and picker view(male, female), save information button

D) Contact Info ViewController after clicking on contact. Inside this controller is an imageview, 2 labels(name surname, phone number) and 2 button(call, delete)

E) Think of the way of adding edit somewhere(you personal preference). User must be able to edit name, number and gender.

When you click to «Save» button, new contact should be added to your main view controller. You can delete your contact by swiping left and discovering red delete button. DO EXACTLY HOW IT'S IN THE VIDEO
APPLY MVC!!
