Assignment-4(Browser)

Create a browser application for iPad and iPhone using
UISplitViewController(master and detail).The application must contain
the following:
  a) List of websites you want to visit(tableview)
  b) 2 sections of websites(list and favorites)
  c) WebView where your website loads up

User must be able to add a new website by clicking on a plus button on
the navigation bar by entering the title and url of the website on the
alert dialog. In order to add a particular website to favorites user
must load this website and tap on it 3 times(Same thing to
remove).Background of the favorite website must change to yellow. WATCH
